

Female Doggie Diaper Wrap - Basic Instructions

Place a self-adhesive disposable pad inside of diaper, cut to size if needed, see above.
Bring widest part of diaper (Velcro Straps) between the dog's legs, as shown above.

It may be just as easy to start by bringing the dog's tail through the diaper tail hole first.
Then bring Velcro straps through (between) the dog's legs, as shown above.

Finish by fastening the Velcro straps. Adjust as needed. Also, replace our unique Disposable Pads as needed.
Available in Packs of 12, 24, 36 & 48, see above for correct diaper size.
